

Let's do our part to help!

Electricity generation emits harmful greenhouse gases (GHG's) that contribute to climate change. If every household in Canada changed just **ONE** incandescent lamp to an compact fluorescent lamp, our country would save over

\$ 73 million in energy costs every year!!! and reduce GHG emission by **397,000 tonnes** of carbon dioxide, which would have the same impact on climate change as taking **66,000 cars** off the road for **ONE year!!!!**

Contact your nearest Westburne Electric Branch for *Philips Marathon Compact Fluorescent Lamps*
